Volkswagen –
da weiß man,

was man hat.

What the fuck are you doing?

What the fuck am I doing?

- Yeah!

My God, Denny, give me a break!

Do you think you can just
come right in, like...?

We're not in a motel room together!

I'm sorry.

- Well, fuck your sorrys!

Denny!

- Sorry, I...

God, what the hell are you thinking...?

I didn't think it would be such a big deal.

- Well, it is a big deal!

You come in here, like,
you know....

We're not in a motel room,

God! I got stuff I might be
doing in here, Denny!

You don't just come in here.

'Hi, I'm Denny!

Who cares what anyone thinks?'

You don't care what I think!

'I'm Denny.' Who cares?

Coming in here.

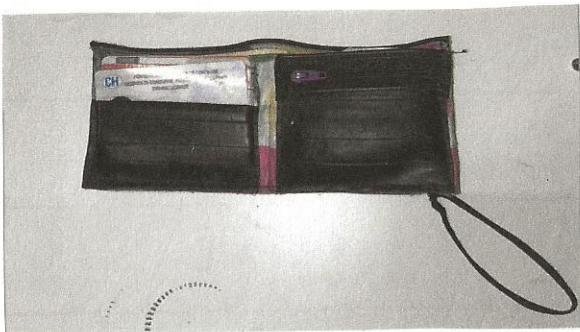

you know, Denny?

Don't come in here!

2 swiss chewing gums for a friend because she likes Swiss chewing gums

TIM'S

SHOES

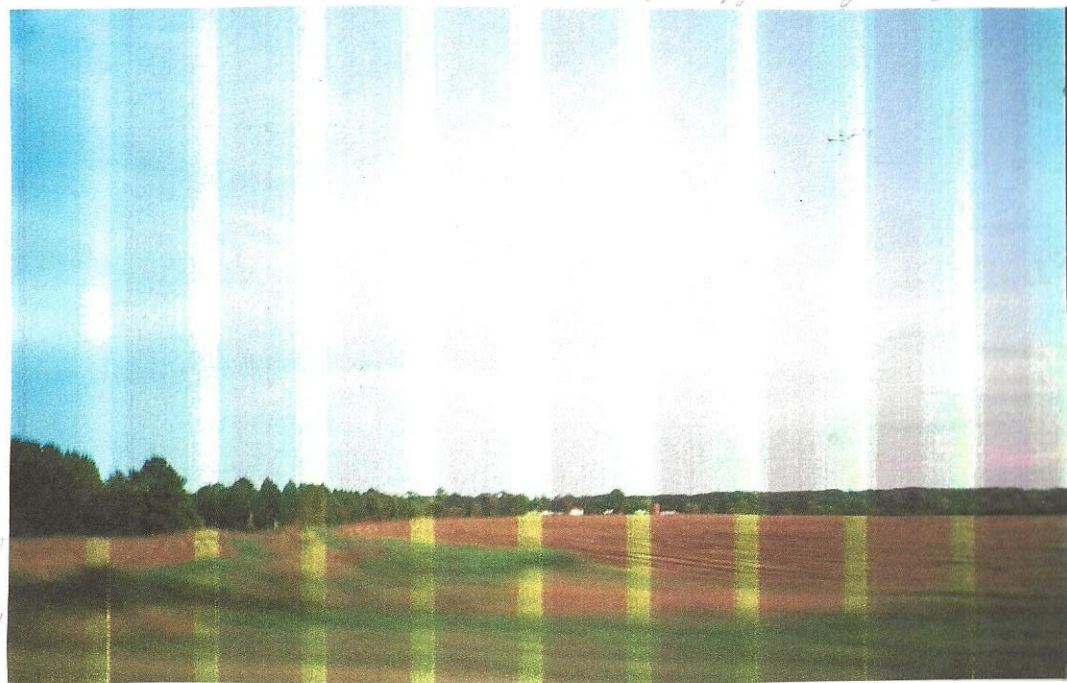

My first running shoes. Beat those suckers down so badly that the sides seam tore up. Did a marathon in them without cushioning.

My favourite pair that I wear every single day. They have been everywhere, even when I travel. These were repaired in turkey (very badly). And red shoelaces because max fischer has worn them.

Belgian army boots I bought at a surplus store in Vienna. Gonna get some leather real shoelaces soon so I can wear these instead of the converse, because if you live in a city, you'll never know when to kick a door down to save a guy from a heroin overdose.

These were my beginning running shoes and just casual wear. They look comfy, but NB isn't comfortable really...

Nikes I bought because they looked cool... Worst decision.

My 2nd pair of running shoes, with cushioning! They're comfortable just to wear.

+ my EDC

I swiss champ that's in my car compartment. My EDC. My model is called the swiss champ. Not the Swiss Champion. The Swiss champion ain't got no plyers. Without me my swiss champ would be useless. Without my swiss champ, I am useless. When I leave home, I carry a swiss champ.

THIS IS VOLCANO POAS.

MY HOST FAMILY'S SON ARTURO
DROVE ME 1.5 HOURS TO IT.

WE PARKED THE CAR AND WALKED
TO THE VOLCANO.

AFTERWARDS WE HAD TO SPEND THE DAY
DOING ERRANDS AND IN TRAFFIC.

The spring loaded inverted pendulum (SLIP) has emerged as the right template for studying dynamic locomotion, whether in robots or animals. The SLIP template, which is nothing more than a mass on a spring (a simple pogo stick), has not only accurately modeled the most successful running robots built to date, but also has proven a good descriptive model for the center of mass trajectories for runners as diverse as humans, horses, cockroaches and crabs.
